Stock/Futures Exchanges and Trading Practices (OHC)

Trading on the basis of comprehensive data

- Coverage of stock exchanges worldwide
- Depiction of market practices
- Comprehensive holiday calendar

... supporting your global trading activities

Securities and *derivatives* are traded around the clock and around the world. New communication technologies, such as direct brokerage via the internet have laid the foundation to participate in trading at any time and anyplace.

OHC by WM Datenservice provides effective support for trading and settlement systems, aiding in the timely implementation of market requirements.

OHC data includes comprehensive market practices as well as characteristic trading practices on all German stock exchanges and XETRA, as well as the most important markets in all time zones (USA, Europe and Asia), including principal segments and futures exchanges. The product currently covers approx. 400 stock exchanges and MTFs.
