

CETRELSecurities

Description of WM interface:

Reference data is the engine of today's banking business

To obtain high quality financial information, you need to integrate first-class sources. To help you maximizing the added value of the information coming from the major Financial Data Providers, CETRELSecurities has developed a unique state-of-the-art solution for the Luxembourg and the European financial markets. Obviously WM Daten is an absolute must, especially for tax information and corporate actions, and thus CETRELSecurities had of course to offer integration solutions for WM's various feeds. (VF1 / FOF)

Thanks to our secured leveraged platform, monitored 24 hours a day, 7 days a week, we interface your banking applications with the best Financial Data Providers of the market, increasing your level of straight through processing, while avoiding you to install and maintain any complex in-house application.
