

intellixx.gmbh

Description of WM interface:

intellixx offers efficient business and technical solutions in the financial industry based on the in-house developed Operational Components. These modular components ensure the success of projects, increase the quality and optimize the costs and time.

mappixx is a modular solution based on the Enterprise Application Integration (EAI) approach. mappixx includes a complete, automated and seamless integration of WM-Data in different formats and systems.

mappixx is an integration environment with great benefits of connectivity and integration of different systems and interfaces. For technically sophisticated systems mappixx provides a GUI-based platform for the specification, test, documentation and implementation of IT integration projects.

mappixx offers an efficient migration solution from VF1 in FOF and ensures a smooth transition to a FOF-tuned technical environment.
